1. COPS, Publicis in advertisement campaign, early 1990s. *Publicis Advertising, Ltd.* © 1990. *Publicis Advertising, Ltd.* All rights reserved. *Publicis Advertising, Ltd.*

anyone who has ever been in a room with a bad smell knows how uncomfortable it is. The same goes for bad behavior. When you see someone who is rude or disrespectful, it can be a real turn-off. But what if you could change their behavior? What if you could make them see things from your perspective? That's the power of a good story. A story can make you feel like you're part of something, like you're on a journey with someone. And when you're on a journey with someone, you're more likely to understand them, to see things from their perspective. So if you want to change someone's behavior, start by telling them a story. A story that shows them how their behavior affects others. A story that makes them see things from your perspective. Because when you see things from someone else's perspective, you're more likely to change your behavior. And that's the power of a good story.

I have been taking the medicine for about 10 years and I have been feeling better and better.

1. **Product Marketing** Can also be called **Product Management** or **Product Development** or **Product Design**. It is the process of creating a new product or improving an existing product. It involves identifying customer needs, developing a product concept, and creating a product plan. It also involves marketing the product and managing the product lifecycle.

| Question                                   | Answer                                                                                                          |
|--------------------------------------------|-----------------------------------------------------------------------------------------------------------------|
| 1. What is the purpose of the study?       | To determine the effect of the new curriculum on the learning of the subject of Science in the primary schools. |
| 2. What is the research design?            | Quasi-experimental design.                                                                                      |
| 3. What is the sample size?                | 100 primary schools.                                                                                            |
| 4. What is the data collection instrument? | Questionnaire.                                                                                                  |
| 5. What is the data analysis technique?    | Descriptive statistics.                                                                                         |

1. **What is the purpose of the study?**  
 2. **What are the research objectives?**  
 3. **What is the research design?**  
 4. **What are the variables?**  
 5. **What is the sample size?**  
 6. **What are the data sources?**  
 7. **What are the data collection methods?**  
 8. **What are the data analysis methods?**  
 9. **What are the results?**  
 10. **What are the conclusions?**  
 11. **What are the limitations?**  
 12. **What are the implications?**  
 13. **What are the recommendations?**  
 14. **What are the future research directions?**  
 15. **What are the references?**
